DETAILED ACTION

Election/Restrictions

1. Upon review of applicant's response dated 10/16/2006, it is noted that a restriction/election is warranted.
2. This application contains claims directed to the following patentably distinct species:
 - A. The method of determining maximum acceleration limits for longitudinal or lateral axis of an aeronautical vehicle to include determining maximum allowable vertical inceptor position limits.
 - B. The method of determining maximum deceleration limits for longitudinal or lateral axis of an aeronautical vehicle to include determining minimum allowable vertical inceptor position limits.
3. The species are independent or distinct because: species A directs to maximum acceleration limits while species B directs to maximum deceleration limits. Species A directs to maximum allowable vertical inceptor position limits while Species B directs to minimum allowable vertical inceptor position limits.
4. Applicant is required under 35 U.S.C 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, the independent claims 1, 21, 46, and 71 are generic.
5. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims

Art Unit: 3663

readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
